

MAXI MMA 403

- Capable of welding with Lift Tig mode;
- Selectable VRD protection for greater safety;
- Arc Force, Hot Start and Anti Sticking for greater control and ease of use;
- Digital current meter display for pre-setting and feedback on welding parameters and output;
- Temperature, voltage and current sensors for greater reliability and safety;
- Lightweight and compact design, ideal for portable applications;
- Designed to work with diesel generators and to avoid failures due to voltage peaks.

Model	MMA 403 MV	
Supply voltage (V)	3~380V / 400V±10%	
Frequency (HZ)	50/60	
	MMA	TIG
Input current (A)	33 A	27 A
Input power (KW)	16	12
Duty cycle (40°C 10 min)	60% 400A 100% 325A	
Welding current (A)	20 – 400	
No load voltage (V)	94	14
Efficiency (%)	>90	
Power factor	0.7	
Insulation class	H	
Protection class	IP23	
Cooling	AF	
Net weight (Kg)	21	
Dimensions (mm)	560 x 260 x 480
