

Mini MMA Inverter Range

Very small, but powerful!

This ultra-light and very small High Power welding machine is a Best-Seller in the Heavy Industry.

It has the latest generation of IGBT (nanotechnology) semiconductors on the board, which means that this MMA welding machine can work with welding cables up to 100m without any loss of power.

Main Features:

- IGBT technology
- Suitable for working with generators
- Small size and extremely light
- Equipped with LED display
- Protection against overload/overvoltage, phase defects and overheating
- Arc-Force and Hot-Start regulation
- Suitable for all types of electrodes
- Low power consumption
